Toujours **bien agiter** avant usage

Always **shake well** before using

*Rince bouche* **analgésique**  
**Onral**<sup>TM</sup>  
**Analgesic** mouthwash

### How to use

Rince mouth with 5 ml (1 teaspoon) for 1-2 minutes. Do not swallow the product. Use up to 4 times daily or as directed by a health professional.

### Ingredients of the the Onral formula and their functionalities

**Micronized benzocaine:** local anaesthetic used to numb tissues in varies clinical needs-micronized for optimal dispersion.

**Polyethylene glycol (PEG) 300:** lubricant allowing the benzocaïne to disperse uniformly in the suspension base and acts as a stabilizer.

**Vitamin E TPGS (Tocophersolan):** stabilizes and preserve the formula, ads antioxidant properties, improves the active ingredient`s penetration of sensitive oral tissues.

**Potassium sorbate:** preservation agent inhibiting the growth of micro-organisms and extending shelf-life.

**PVP-K30 (Povidone):** water-soluble polymer used as dispersant for active and non-active ingredients, contributes to better shelf-life by preventing precipitation.

**Glycerine:** humectant, emollient- oral comfort.

**Natural orange flavor:** masking agent.

**Sorbitol:** improves flavor without encouraging the growth of microorganisms in the product.

**Tartrazine (yellow #5):** color.

**Citric acid:** enhances penetration of the benzocaine, improves shelf-life.

**Although this is a non-prescription product, it should be kept behind the counter to ensure oversight and appropriate use.**
